HOW JAM PROOF WORKS

- 1 As you insert paper, the shredder electronically measures paper thickness to prevent paper jams.
- 2 Watch the light bar while you shred:
 - Green to yellow means you are within the recommended range
 - Red means the shredder is overfed – just remove the excess paper to resume shredding
- 3 If a misfeed occurs, our 100% Jam Proof System will power through it!

SilentShred™
Operation shreds quietly for shared workspaces.

SafeSense® Technology stops the shredder immediately when hands are too close to the paper opening.

ENERG savings system optimizes shredder efficiency to reduce energy costs.
